ae St. Johns River, on the high, rolling, miles of lake shore will finally be acquired. ine lands of the great "orange ridge" of Florida. It is easily accessible from Jacksonville by rail over the A. C. line, being a ride through many small towns, piney woods and hammocks, and thrice crossing the hyacinth-covered St. Johns; or the traveler may reach the town via the Florida East Coast railway, taking tickets at Jacksonville to Orange City via St. Augustine, Palatka and New Smyrna. De-Land is connected with Orange City by a regular stage line carrying U.S. mail, and a fine shell road. This drive of five miles through the magnificent forests and over the shell road makes this route a popular one for the tourist. The most picturesque route to De-Land is by river from Jacksonville to Lake Beresford, which is DeLand's landing on the St. Johns. This route is one often taken by the tourist who comes to Florida for the first from the commodious and comfortable steamer of the Clyde St. Johns river line, the traveler reaches DeLand either by rail over the

meets all boats. CLIMATE AND HEALTHFULNESS.

Early in your sojourn you will wish to assure yourself by observation and inquiry regarding the climate of Florida in general, and that of DeLand in particular. We will suppose that you have come in December or January. You notice that most of the trees are in tull leaf. Choice roses, seen in the North only in green-houses, are blooming unprotected in the gardens. Everything reminds you of the finest May or June days of the most favored northern states. The months from November to March may be classed together. While the summers are long, lasting until October, the peninsular form of the state the constant breezes, and the frequent showers, prevent the extremes of oppressive hear frequent inland much tarther north. April and May, October and November are the fines. months of the year.

Many people who have come here from the North, East and West, or from one of the southern states, testify that the chinate has given them great relief from rheumatism asthma, catarrh, consumption, and various diseases of the throat and lungs. The benefit. to be derived from life in the mild, open an are available, and are enjoyed by hearty and teeble alike, throughout the entire year, winter and summer. The city is for miles surrounded by forests of the southern pine, enriching the air with balsam. The atmosphere at DeLand is remarkably dry for Florida, There are no lakes, rivers or swamps in the immediate vicinity, and the deep deposit of porous sand provides perfect surface drainage. Maiaria is practically unknown. These conditions, with an abundance of pure artesian water, and careful sanitary arrange ments, make this unquestionably one of the most healthful places to be found anywhere.

PUBLIC IMPROVEMENTS.

In the way of public improvements can be mentioned several miles of the finest she roads, electric lights on the main streets o. the city, a system of water works that it owned and operated by the city, supplying tue parest water at a little above cost; als furnishing adequate fire protection and securing a low rate of insurance. An electric ligh. plant furnishes lights for street and interio. lighting. We also have an ice factory, supplying DeLand and the surrounding country with the article so essential to comfort in northern as well as southern chines.

RELIGIOUS AND EDUCATIONAL.

Nine houses of worship testify that DeLand is a church-going community. Baptist, Episcopalian, Methodists (Northern and Southern), Presbyterian, Christians, and Roman Catholics, besides colored Baptists ond Methodists, are represented. The graded school offers an eight years' course, and the building which it occupies is new and newly furnished throughout, and is one of the most commodious and best equipped public schools in the state. A certificate of graduation from this school is accepted at John B. Stetson University and entitles the pupil to entrance into the academic course there.

JOHN B. STETSON UNIVERSITY.

This is the leading educational institution in the state, and attracts many families to DeLand for the winter months. The institution has about \$350,000 invested in buildings; 40 instructors of ability and assistants, from noted colleges of the United States and foreign countries, constitute the faculty. At the present time about 400 students are regis tered. John B. Stetson University is affiliated with the Chicago University, pro rata credit being given in either institution for work done in the other. Stetson has a productive endowment of \$200,000. The buildings are large and substantial, every comfort being provided, as in a modern hotel. Catalogue. may be obtained free by addressing the presinent, Dr. J. F. Forbes.

BICYCLING. Pavements in and about the city and the excellent paths that have been made to adja cent towns and points of interest, offer unexceiled opportunities to the wheelman. Those who have ridden bicycles on almost every kind of road and pavement are unanimous in the opinion that our pavements are as good as asphalt. Besides the paving of the streets in the city limits the residents beyond the corporate bounds have extended the roadway in some cases several miles. An excellent bicycle path has been made to Lake Beresford three miles distant; also a good shell road to Orange City, five miles south, and a path to Lake Helen, five miles distance by way of Lake Winnemissett.

FISH AND GAME.

Florida waters, fresh and salt, abound in fish, and the hunter need not go far to find good bird shooting. The lakes of the DeLand Aquatic Club, one and a half miles east of town, are well-stocked with bass and smaller fish, and afford great sport to those piscatorially inclined. During the hunting season, guides take the tourists to quail grounds and seldom fail to bag a goodly number of these fat and juicy morsels.

THE DELAND AQUATIC CLUB.

This club was organized in 1901 by our lead. ing citizens, who recognized the need of water attractions for the tourist and home people. The club has purchased a thousand acres of land surrounding several beautiful fresh-wa ter lakes, in which splendid fishing is found. The club-house is about a mile and a half east of town, and is reached by a splendid paved street and bicycle track on New York avenue. A convenient and commodeous club-house or pienie affords a place for the si party to rest, to secure a? water, or to write, read

NEAR-BY ATTRACTIONS. Going east thirty miles, those who desire a change of air and scene, especially in the summer, find on the neighboring coast some of the finest stretches of ocean beach in the world. DeLeon and Blue Springs are most interesting natural objects within easy driving distance from DeLand, and the roads in any direction present a pleasing variation of orange groves, giant pines, little lakes and tropical ooking "hammocks."

HOTELS AND BOARDING HOUSES.

Your first questien on reaching DeLand is for a stopping place. A great variety is offered-from the most palatial hotel to the modest, home-like boarding house kept by ladies of refinement. Whatever one wants he can be accommodated. The cards of several time. From Beresford, where he disembarks of our hotels and boarding houses can be found in this paper, and the proprietors will take pleasure in furnishing rates or any other information desired.

DeLand Branch, or he may take a hack which Nearly all of our hotels and boarding houses are surrounded by attractive yards and majestic shade trees, and all face paved streets For a quiet home-life, they are unexcelled. Pienic parties are gotten up weekly by the guests and hosts and pleasant days spent at picnic grounds from three to ten or twelve

HOUSES AND COTTAGES. There is great demand for furnished house

luring the winter season, and persons who ntend to come for the entire season should procure their accommodations in advance. and the integrity of its territory were dive or six-room cottages, furnished, rent for \$10 to \$15 a month; larger houses, from \$15 of 'boys and miscreants' gathered from for a modest residence, to \$100 per month for the slums and trained them until their i place with all modern improvements, etc. PRODUCIS

DeLand is in the midst of one of the most aportant orange growing sections of Florida. onsiderable fruit was shipped from this secion last year. The coming season will see targely increased shipments, and the time is should also be remembered that his not far distant when in all probability this will again be a great orange producing councry. The production of the pineapple here promises to rival that of the orange. Recent experiments prove that with comparatively nexpensive protection such soil and climate is that of DeLand will profitably produce iruit which in size and quality far surpasses the pincapples grown without shade further

In June or July large quantities of delicious lagara grapes ripen. Excellent peaches, pears, Japan persimmons, Japan plums, pecan tuts, guavas, strawberries, watermelons, and nany sub-tropical fruits are grown here with uccess. For the local market and family arden, an almost endless variety of vegetades may be produced during the entire year. The soil is particularly adapted to corn and weet potatoes. Recent trials prove that an musually high grade of tobacco may be projuced on the high pine land. Parts of Volusia county are adapted to the cultivation of

ugar cane. MANUFACTORIES.

The chief manufactured product of DeLand and vicinity is lumber. The abundant supply of yellow pine and cypress might be made into | said. great variety of articles now shipped in from a distance. Among the maunfacturing adustries already established, we have an ice dant, a fertilizer factory, a novelty woodworking extablishment that turns out many useful things in its line; a cassava starch facory here and one at Lake Helen, giving emoloyment to many hands and working thouands of acres of land.

OUR PEOPLE. The people of DeLand are from almost every art of the United States. They are intellicent and progressive. They have worked enhus/astically for twenty-four years to build ip their beautiful little city. Uninterrupted progress and improvement have been the reult. Their desire now is that as many as posble of those who are turning southward may see for themselves what DeLand offers both o settlers and winter residents; for then nany more will surely agree with the many who now pronounce DeLand on account of er climate and her people, her university, hurches and fraternal organizations, her hoels and her homes, her products, her public mprovements and her merchants, the most ettractive place in all the southland for them.

A Deep Sea Snake. The chersydrus is a snake over three

and one-half feet long, which inhabits the mouths of rivers and streams from southern India to New Guinea, which never leaves the water, occurs far out at sea and feeds on fish.

Power In Fungi. A single fungus plant has been

known to attain a weight of thirty-four pounds in six weeks. The power of expansion which fungi possess is wonderful. Great toadstools will sometimes lift heavy paving stones out of their bed, and it was once necessary to repave the whole of a certain town in England in consequence of such a disturbance.

Considerably more than half the population of the earth is in Asia, and yet there are but forty-eight people to the square mile as compared with ninety. four in Europe.

Milk In Jamaica. Jamaica has no milkmen. The milk istributed by native women, who

GERMAN KALI WORKS

"MAD ANTHONY" WAYNE.

He Was the Sanest, Coolest Soldier

In Washington's Army.

John R. Spears in Harper's demon-

strates that General Wayne, commonly

known as "Mad Anthony," was in

reality the sanest, coolest soldier in

"They called the hero of Stony Point

and the Maumee rapids Mad Anthony

Wayne," says Mr. Spears. "The title

was originated by an Irish soldier who

had been confined in the guardhouse at

the order of the general, and it was

taken up by the people because of the

wild enthusiasm and determination

with which Wayne led his men when

the supreme moment of buttle came.

But observe that when the war of the

Revolution impended he 'ransacked his-

tory' for accounts of battles that he

might learn military tactics, and he

gave his days to the training of his

neighbors. At Stony Point he led his

men in spite of his wound, but in pre-

paring for the battle he appealed to

the pride of his men by parading them

'clean shaved and with hair well pow-

dered,' while the prelaid plans includ-

ed even the slaughter of the dogs, that

no yelp should betray the approach of

the assaulting host. When in Virginia,

he charged the hosts of Cornwallis

with only 500 men to back him; when

in Ohio, where the honor of the nation

committed to his care, he took a legion

skill with the musket equaled, if it did

not surpass, that of the most noted

"Mad Anthony Wayne as a leader

in battle was unsurpassed, but it

record as a drill master is unequaled."

A Witty Reply.

court, on hearing the argument of

counsel for plaintiff, in error, is entirely

satisfied that he has no case, the chief

justice is apt to say to counsel for de-

fendant in error that the court does not

care to hear further argument. At one

time Hon. Matthew Carpenter from

Wisconsin was counsel for plaintiff in

error and opened the case. Before he

was through the court was satisfied

that there was nothing in it, and so

when he had concluded and counsel

for defendant in error arose Chief Jus-

tice Waite said, "The court does not

Counsel was a little deaf and, al-

though noticing that the chief justice

spoke, did not hear what he had said

and, turning to Mr. Carpenter, who

sat beside him, asked what had been

"Oh, hang it!" replied Carpenter in

you all about

Dr. Miles' Nervine Cured Me.

When the nervous system has been shattered by the use of deadly drugs there is nothing to equal Dr. Miles' Nervine in restor-ing it to health and normal activity.

"I feel so grateful for what Dr. Miles' Restorative Nervine has done for me that I must tell it for that part of humanity that suffers as I have. During the three years I suffered from nervous prostration I found no relief except when doctors gave morphine. To get iid of suffering I took morphine myself as it was the only thing that would give ease, and now you, who point with scorn at morphine using, how could you, when in such agony, knowing it about the only thing that would give relief, resist it? I knew it was a terrible habit and I knew of its deadly was a terrible habit and I knew of its deadly grasp, but I never fully realized its significance until I had used it a number of months. Oh, the misery of being addicted to such a habit. I resolved then and there to quitit and resolved I would never be a slave to my such demon. About this time I hap pered to notice Dr. Miles' Restorative Nervice adverised and ordered a bottle. After using five bottles I can truthfully say I am cured using morphine. Now, however much persons may doubt it, God is my witness I am cured. This testimonial is unsolicited but I feel it my duty to give it for the benefit of the suffering." - MATTIE PHILLIPS, Prescott, Ar
